Re Sea

Good remark on cleavage
and on columns

The presence of the Primary
Limestones argument in
favour of out side metamorpho-
sis but separation

p. 13. Geograph. Journal Vol V.
comes from the bottom
with slugs. Theraps & Angara
is frequent. - It cannot be
linked with new fungi
- Carp lucy

p. 224 - Shows multi return after
alteration into dry land

Mem. Transportat. of
shells & sea wood

Falkland, no Balders

∴ subsidence

(Barn Marchauxen
story of frozen horse)

Grd being found near
surface of granitic
countries, same ^{vapor} rising upwards

Tension?

has it effect in
compression? -
